EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to ensure correct dependency status:

Claim 25

The ~~method~~ system of claim 24 wherein registers are scalar registers predicate registers.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest the method of debugging an executing service on a pipelined CPU architecture comprising restoring the state of the executing service; determining if registers are unstable; and saving the value of any registers that change after each pipeline cycle in combination with the steps of saving old values of the registers before new values are written to the registers, as recited in independent claim 7. Claims 24, 39 and 42 are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art of record, **Rosenberg**, disclosed debugging an executing service (pages 45-53), setting breakpoints (page 98), saving and restoring minimum state (as discussed in previous rejections to claim 1) and adjusting program counter (page 99). However, **Rosenberg** failed to disclose the independent claims as recited.
